Meet EMT

At EMT our main goal is to offer the best bagging, blending and handling solutions possible to our customers.

EMT, located in 't Zand, The Netherlands, specializes in the development and production of blending, bagging, and transport equipment for the fertilizer, and other bulk industries. It stands as a beacon of innovation and customer-centric design. With having installed over 600 machines in more than 80 countries worldwide you know you can rely on EMT's machines.

At EMT BV, we take pride in the complete development and production of our machines within our own facilities. Our dedicated team of mechanical, electrical, and software engineers meticulously designs each machine, ensuring the high quality of our machines.

Our in-house sales team possesses extensive knowledge and deep experience in developing bulk handling factories, fully understanding the complexities involved. With a wide variety of machinery designed to meet the specific needs of both European and global markets, we are equipped to address all bulk handling challenges our customers may encounter.

A family owned business with a
worldwide
presence

Established in 1913 our family owned company is a testament to the blend of tradition and innovation. The company has a long history in the agricultural sector, starting as a supplier of animal feed and later fertilizer to local farms, and is now grown out to a global supplier of high end, customer specific, handling equipment.

With the brothers Gustaaf and Janco Zeeman from the 4th generation of the Zeeman family and Zico Zeeman from the 5th generation, the family-owned company continues to lead in its field, driven by a commitment to excellence and customer satisfaction

OUR History

Our History goes back to the year 1913 when the great grandfather of the current generation bought a second-hand windmill for the milling of grain.

More than 110 years of business

A legacy started with a Windmill

In 1913, the first generation in the family business bought a windmill to process grain for the local cow farmers in their home village. After developing the business, the business became an animal feed producer and supplier of fertilizer the local farmers.

Starting as a machine supplier in the Fertilizer industry

With the increasing demand of specialized fertilizer in the EU the third generation went looking for possibilities to import blenders from abroad. This resulted in also importing these machines for other companies which was the start of EMT and the partnership with Doyle from the USA. With this partnership EMT became the representative for Doyle outside the Americas.

Engineering and Producing Full factory solutions

While still importing machines the fourth generation started production of machines to customers desired specifications. This resulted in the EMT of today with a full inhouse engineering department and technical production facility capable of delivering full factory solutions. This resulted in the delivery of more than 600 machines all over the world.

Ready for the future

As evident from our history, we always have been dedicated to continuous improvement and future readiness for over a century. Also today we are directing our efforts towards the future through the adoption of new production methods, innovative design techniques, and the automation of our processes.

OUR COMMITMENT TO Quality

At EMT BV, our commitment to quality is our business philosophy. It guides every decision we make, from the selection of materials to our manufacturing processes, and underpins our after-sales support. Ensuring our products and services not only meet but exceed our clients' expectations.

Our dedication to excellence is driven by our investment continuous research and development.

Quality for us is also about our people. We invest in our team's growth and expertise, fostering a culture of excellence that translates into superior solutions for our clients.

At EMT BV, we don't just aim to meet industry benchmarks; we strive to set them, ensuring we remain leaders in our field. Our commitment to quality is what defines us and drives our success.

Our dedication to excellence is further guaranteed through the certification of our ISO 9001 quality management system by an accredited testing authority.

Blending Solutions

With over 40 years of blending experience at EMT we can always make sure we offer you the best solution. With our wide range of blending machines we always have a machine for your situation.

As a supplier of Doyle batch blending equipment and a producer of EMT's own developed weighcont continuous blending system we always have a machine for you blending needs. From batch blenders of 10 tons per hour, continues blending sytems of 300 tons per hour or even blending lines built in to trailers EMT has a machine for your blending needs.

- Weighcont - Continuous blending 20-300T/h
- Weighcont Portable 40ft - Continuous blending 20-200T/h
- Weighcont Trailer - Continuous blending 20-200T/h
- Shamrock blender- Batch blending 20-80T/h
- Vertical blender - Batch blending 30-70T/h
- Tyler-Kraus - Batch blending 20-40T/h
- Smithbuilt - Batch blending 25-30T/h

Small Bagging Solutions

Our small bagging machines have the capacity to bag up to 100 tons per hour. All of our machines are built using stainless steel like our loadcell, cylinders and all the materials that is in contact with the product and feature a mild or stainless steel frame for durability. Our bagging equipment is designed for efficiency and can be customized to fit in the building and maximize productivity. With a selection of over 10 customizable small bagging machines, we always have a suitable solution for your needs. Whether you require a budget-friendly, low-capacity bagging machine or a high-capacity industrial solution, EMT has the solution for your bagging needs.

- Small Bag Quattro Line 80-100T/h
- Small Bag Portable Container 20ft 80-100T/h
- Small Bag Portable Container 10ft 40-50T/h
- Small Bag Enviromental Closed 30-50T/h
- Small Bag Double Unit Portable 30-50T/h
- Small Bag Double Unit 30-50 T/h
- Small Bagging Roll Form Fill 25-20T/h
- Small Bag Single Unit 15-30 T/h
- Small Bag Gross/Nett 15-30 T/h
- Small Bagging Hand Operated 10-15T/h
- Small Bag Single Compact 10-15T/h
- Small Bag Big Bag Combi 10-40 T/h

Big Bagging Solutions

Our Big bagging machines can bag from 10 up to 300 tons per hour.

All of machines are constructed of stainless steel with a mild steel frame.

Our efficient, customizable bagging equipment minimizes waste and optimizes productivity.

With over 20 customizable big bagging machines we can always deliver a solution that is suitable for your situation.

From budget friendly low-capacity bagging machines to high capacity industrial solutions, EMT has an answer to your big bagging needs

Big Bagging

- Big Bagging in 3 Horizontal 20ft containers 3 lines 200-220T/h
- Big Bagging in 3 Horizontal 20ft containers 2 lines 120-140T/h
- Big Bagging in Vertical Container 2 lines 100-200T/h
- Big Bag High Speed Twin 120-140T/h
- Big Bagging in Vertical Container 1 line 60-120T/h
- Big Bagging for mineral stones 40-100T/h
- Big Bag High Speed 60-70T/h
- Big Bag Low Profile 30-40T/h
- Big Bag Economic 30-40T/h
- Big Bag / Small Bag Combi 10-40T/h
- Big Bagging Conveyor filling 25-30T/h

Coating Solutions

Our coating machines delivery perfect coating results with efficiency and precision.

With capacities ranging from 20 to 300 m³ p/h with our intergrated and portable machines EMT can deliver the right coating solution for you.

And with over 600 machines installed worldwide you can trust that EMT deliver what they promise .

- 
- Portable Coating 120m³/200m³/250m³
 - Fertilizer Inhibitor Treating Unit
 - Portable Coating with Conveyor
 - Portable Coating with Conveyor and Bypass
 - Coating High Capacity 300m³
 - Portable Coating 200m³
 - Coating Stand Alone
 - Coating in factory
 - Portable Container Coating Unit

Handling Solutions

Our handling solutions are the result of 30 years of experience and engineering.

All of our transport solutions are optimized for efficiency and productivity and can be customized to meet the customer's specification.

From standard belt conveyors, Box filling conveyors, screw auger and bucket elevators EMT has the best way to move your product to the next level.

- Portable Box fill conveyor
- Belt Conveyor
- Shuttle conveyor box filling
- Bucket elevators
- Industrial conveyors
- Screw augers
- Chain Conveyors
- Crushers
- Roll breakers
- Screens

Additional Equipment

EMT BV offers a diverse range of additional equipment to complement and enhance your operations, including forklifts, fertilizer pick-up buckets, labeling machines, sewing machines, sealing machines, and weigh scales. Our selection is designed to cater to various aspects of your production and packaging processes, ensuring efficiency, durability, and optimization of productivity.

Whether you need to streamline your labeling process, improve the efficiency of material handling with forklifts and pick-up buckets, or ensure precision with weigh scales, EMT BV has the solution.

Our commitment to providing high-quality, durable, and efficient equipment extends across our entire product range. With EMT BV, you can enhance your operational capabilities, minimize waste, and achieve higher productivity levels, ensuring that every aspect of your process is optimized for success.

- Intermediate tipping bucket
- Marking equipment
- Sewing machines
- Weighing Scales
- Pick-up Buckets
- Compressors
- Box Walls
- Forklifts
